

# The Truth About Airline Safety

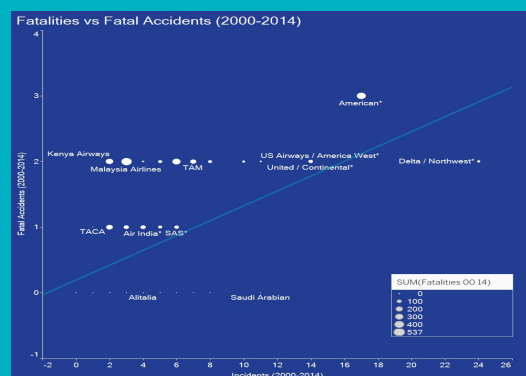

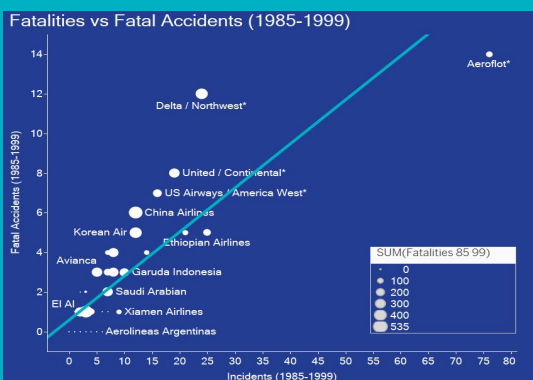

Flights have increased from 5.5 billion to 27 billion from 1985-2014.

Despite increases in total flights, total fatalities have significantly fallen.

Along with the decrease in total fatalities is a decrease in incidents and fatal accidents.

Average incidents dropped from **7.18** to **4.125** per airline.

Average fatal accidents dropped from **2.18** to **0.66** per airline.

Average fatalities dropped from **112.41** to **55.52** per airline.

Average flights increased from **8.4 billion** between 1985 and 1999 to **17 billion** between 2000 and 2014.

Flying has consistently gotten even **safer** in recent years.

Oceanic Airlines is **committed** to getting you where you need to go with no issues.
